

**NEW**

# The DAA Vac

*Every Shop Needs One!*

- Removes bugs, dirt, lint and debris from wet paint/clearcoat
- Eliminate costly re-paint work
- Uses existing air source in the paint booth
- Disposable clear tips easily replaced to eliminate cleaning
- Lifetime guarantee on the DAA Vac aluminum body

The new DAA Vac (DanAm Air Vac) from Dan Am Company removes foreign objects from wet paint. Eliminate dirt nibs, bugs, lint, hair or other airborne debris right after it lands. The DAA Vac simply connects to your existing airline in the booth. Open the valve and the air creates a vacuum through the tool. Use the fine clear disposable tips to remove the debris from the clear, and use the disposable dropper to put a drop of clear back into the void. The clear will melt into the wet surface and you may have very light sanding and polish for perfection, if any at all.

**Kit Includes**

- DAA Vacuum
- Ball Valve
- 4' Black suction Hose
- Tip (black hose)
- 12 Disposable Clear Tips
- 1 Disposable Dropper
